

# BAND-IT

## FEATURES

- BANDIT is a treatment, not a tourniquet.
- Features a unique, non-constrictive design consisting of two soft-plastic plates curved to the shape of the forearm.
- It is a medically designed device which works with the human anatomy to aid in the relief of Carpal Tunnel Syndrome and Tennis Elbow pain without cutting off circulation, hampering movement or causing uncomfortable swelling.
- Allow normal circulation (blood flow) and, may be worn for long periods of time with complete comfort.
- It is simple to apply and it works in a completely new and unique manner
- It is highly effective in relieving pain commonly associated with Carpal Tunnel Syndrome and Tendonitis
