

# SEROLA ELBOW

## FEATURES

- Soft, comfortable material Pocket for holding Gel Arc foam pad at buckle for added comfort
- Taking the stress off the epicondyle helps prevent further injury and pain, and allows for more efficient healing
- The Serola Gel Arc has the proper damping characteristics to absorb shock and vibration far better than the other both materials, and can do both at the same time.
- The Serola Gel Arc Elbow Brace uses a hypoallergenic foam under the buckle to maintain ultimate comfort.
- The Serola Gel Arc can be removed from its pocket in the armband and positioned in two ways for each arm.
